## Advanced Technology Video (ATV) announces the release of *A&E Specifications*

Coppell, TX – February 5, 2013 – Advanced Technology Video (ATV) a leading provider of innovative video security surveillance solutions is happy to announce the release of new Architect & Engineering Specifications (A&E Specifications) currently on the [ATVVideo.com](http://www.atvideo.com) web site for immediate download.

The A&E specifications are intended for use by the design and construction professional to assist in the development of project specifications for video security and surveillance systems. Each specification follows the industry recognized standard format created and published by the Construction Specifications Institute (CSI).

As requested by several ATV customers, and with the release of the new IP product solutions, it was decided the IP product line would be the first products generated as A&E specifications.

David Fowler, ATV Product Manager, holding both Project Management Professional (PMP) and Certified Construction Specifier (CCS) certifications and degreed in Architectural Engineering spearheaded the effort alongside Larry Kaatz, ATV's Technical Specialist, who indicates additional A&E specifications will be released this year for entire product line.

David reports *"ATV has a rich history assisting system integrators in building and campus security system designs and we trust these new A&E specifications will lighten the load a bit for the architect and engineer communities who rely on the ATV equipment for their security system designs."*

To review the A&E specifications please visit: <http://www.atvideo.com/support-center/ae-specs>.

**About Advanced Technology Video:** Advanced Technology Video has been a force in the security business since 1983. Since then, we've delivered products with unmatched reliability and value to the security industry.
