Advanced Technology Video (ATV) Releases NEW High Performance Professional Series DVRs

Coppell, TX – July 8, 2015 – <u>Advanced Technology Video</u> (ATV) a leading provider of innovative video surveillance solutions, announces the release of three new high performance DVRs to the <u>ATV Professional Series</u> product line.

The new DVRs come in 4, 8 and 16 channel models with Real Time D1 resolution and 960H recording. They feature self-diagnostics with automatic notification including Hard Disk Drive S.M.A.R.T. protocol, multiple search modes and text input for ATM/POS. The **ED2404**, **ED2808** and **ED2916** allow concurrent video display via HDMI and VGA with multiple display formats. In addition the models feature e-SATA capability for extended storage and are compatible with Immix® Central Station Monitoring software by *Sureview Systems*.

"The ED2 Professional Series DVRs provide legacy functionality with our historical DVRs, while providing increased resolution and familiar navigation. A high performance DVR without the high price", says Keith Shaver, ATV's VP of Sales and Marketing.

About Advanced Technology Video: Advanced Technology Video has been a force in the security business since 1983. Since then, we've delivered products with unmatched reliability and value to the security industry. Today we're stronger than ever, with a complete lineup of CCTV products that set industry standards for dependability and support. Our full line of cameras, recorders and other devices are loaded with features you won't find anywhere else at the same price. And we back those products with the best customer service and technical support available anywhere. So take a good look at all we have to offer. It's clear that whatever the needs or the application, ATV offers just what you demand.

Security without compromise
