Advanced Technology Video (ATV) announces NEW 700 TVL Covert Mullion Camera Series

Coppell, TX – March 27, 2014 – Advanced Technology Video (ATV) a leading provider of innovative video security surveillance solutions announces the release of its new **700TVL MullionCam Series** as its newest additions to the **ATV Specialty Camera** product line.

The **CM728PB(S)** is designed specifically for covert installations in environments where facial image and video capture of the customer are needed. The unique mullion camera is equipped with 1/3" CCD offering 700 TVL of resolution, 130°, 2.8mm lens for wide angle image capture, and digital day/night functionality for low-light environments. It's available in black or silver and measures smaller than a passport picture (1.73 x 1.73 x 1.38), which allows it to fit within a standard door frame.

"ATV has another great product to add to our line of specialty cameras. The mullion camera is a perfect covert solution due to its size and capabilities. We are excited to release this product at a great cost", says Bob DeProspero, ATV Business Development Manager.

About Advanced Technology Video: Advanced Technology Video has been a force in the security business since 1983. Since then, we've delivered products with unmatched reliability and value to the security industry. Today we're stronger than ever, with a complete lineup of CCTV products that set industry standards for dependability and support. Our full line of cameras, recorders and other devices are loaded with features you won't find anywhere else at the same price. And we back those products with the best customer service and technical support available anywhere. So take a good look at all we have to offer. It's clear that whatever the needs or the application, ATV offers just what you demand.

Security without compromise
