### CORNER MOUNT BRACKET INSTALLATION

- ▶ Attach the corner mount to the structure using the tapping screws (PTS1, M6x30L) as illustrated in the figure. The corner mount must be attached to a structure such as hardwood, wall stud, concrete or a suitable material capable of supporting the final mount assembly. The installer may need to change the method of mounting or hardware used depending on the corner material.

Align the (wall) mount bracket holes to the corner mount plate holes and secure the bracket using the machine screws (M6x20L).
